Date and place: Kranj, Slovenia, 7<sup>th</sup> October, 2020

**SUBJECT: A letter of reference and a sincere thank you**

As a more than a decade long airborne survey provider operating a fleet of turbine helicopters, Flycom Technologies d.o.o. has made a successful purchase of a DA42 NG twin-engine multi-purpose aircraft which we will be deploying on our airborne surveying missions all over Europe.

We have been overwhelmingly satisfied with the support and service Mr. Hintermayr and his team has provided us in this important step when making all the necessary operational steps to integrate all or our special mission equipment in the aircraft together with DAI team and has helped us made this very complex process as painless as possible with on time support and communication.

We sincerely hope to have the opportunity to work with Aircraft and More team again when opportunity arises and would gladly recommend it to anyone looking to make their purchase in single engine, multi-engine or jet category.

Filip Rojs, CEO  
@ Flycom Technologies d.o.o.
